(54) SAFETY CONFIRMATION SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To issue a message, only when an abnormality really has occurred to the aged or the like, by a system for monitoring and reporting the safety of an old man, who lives alone, or the like at home.

SOLUTION: This system is provided with a calling means 3 for calling an object person 1 by stimuli such as sounds, vibrations or light when abnormality is detected from the action or biological signal of the object person 1 and a confirming means 4 for confirming the reaction of the object person the this call. Thus, the safety of the user 1 can be accurately grasped before reporting, and further an erroneous reporting can be reduced.

LEGAL STATUS

[Date of request for examination] 15.07.2002

[Date of sending the examiner's decision of rejection] 13.12.2005

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of
